Philip Store Building Project

The busy season is upon us and everywhere there are people going great guns to get the work done. This is no different than here at Grossenburg Implement. Our store has been buzzing with activity since the building project began here in April. So far, the building has been completely enclosed with the new outside walls, roof and looks wonderful!

The project has really improved the overall look of the business and has greatly increased the size of our work area. Although, it's a bit hectic and crowded inside with all the work still going on in the rest of the building. The new shop will greatly increase our ability to service our customers. We will increase our efficiency with overhead cranes, as well as the ability to dispense hydraulic and engine oil from hose reels instead of having to cart it by hand from a tank. The entire new shop will be illuminated with new LED lighting, which will eliminate shadows and improve visibility for our mechanics.

Our bulk oil tanks will be moved to the south wall of the building and a new 12 foot roll up door added for easy access to the bulk oil pumps. We will also be adding a 9 foot roll up door on the south side of the building with a back in loading dock for parts receiving. This will speed up truck unloading as it will enable the forklift to drive directly into the truck and off load the freight. To further enhance the south door setup we will be moving our battery filling, charging and hydraulic hose making stations to the new south doors as well. This will make access to the heavy batteries easier and hopefully cut down on oil spills in the showroom from dirty hydraulic hoses.

Every aspect of the new addition should help improve our service delivery and efficiency. We are also adding a new loading dock on the north side of the lot and have recently installed new white fencing around the lot. Hopefully our new look and ability to provide quality business will ensure our continued good relationship with our customer base for many years to come.

We look forward to showing our new building to anyone that wants to come take a look. Grossenburg Implement would like to thank all of our current and future customers for their past, present and future support as we grow our community and businesses together.

Construction Started April 13, 2016

Roof going on May 13, 2016

Completed Sheeting on June 1, 2016

- Thins to gear oil when working; thickens to grease when resting

- Factory fill for all John Deere corn heads

Heavy-Duty Water- Resistant Grease

- Exceptional performance in extremely wet operating conditions

- Superior rust and corrosion protection properties

Heavy-Duty Moly Grease

- Protects against extreme pressure

- Contains 3 percent Moly to smooth rough spots when under sliding pressure

Service Department is Growing

Written by **Bill Kelly**
Service Manager
Philip, SD Store

If you've driven by the Philip store lately, you have probably noticed we are going through a 'little' change. For the past several years Grossenburg Implement has undertaken building projects on some of their stores in South Dakota & Nebraska. By the time the work is done on the Philip location, several crews (construction, electrical, plumbing, heating & cooling, technology & demolition) will have almost doubled the store in size.

The exterior of the original building has been covered in the same siding used on the new construction. On the south side of the building there will be a new dock & area built to unload trucks bringing freight in for the parts department. Eventually, the entire building will be surrounded by a cement surface.

The majority of the new space is for the service department. Heavy-duty overhead cranes will make it easier & more efficient for the unloading of new equipment. Also, the cranes will make it safer & easier for technicians when it comes to lifting heavy engines during tractor repairs. Large equipment set-up will be easier because of the larger shop space.

Some of the new features in the shop area will be a new oil dispensing system & pneumatic delivery system for the technician's air tools. The new shop will have its own climate control system. An area will be built for the service offices along with a new tool room & a new tech support room. There will be a bigger, totally redesigned wash bay. A larger dyno will be in a permanent position for the technician's use. Each technician will have a much larger work area.

The tentative completion date for new construction is mid-July & the date for the completed remodel is mid-September. We ask our customers to have patience with us as we are going through this construction. We are making these improvements to better serve our customers & their GROWING needs.

New Philip Shop Addition

Grossenburg STORE HIGHLIGHTS

A Thank You to the Parents and Leaders of Youth!

*Written by Mike Schultz
Parts Manager
Philip, SD Store*

Remembering back to my childhood day, summers were a lot of fun! I fished a lot, rode bike, swam at the local pool, played baseball and lots of other activities. Some not as fun as other, but I survived!! The best part of summer was no school!

Another thing I can remember about my childhood is my involvement in 4-H chapter, along with the FFA chapter I was involved with well into my high school years. I always remember the couple of weeks leading up to the check in times at the county fair. I remember listening to my parents and leaders hounding me for procrastinating about getting

everything done before the official time we had to check in (by the way it's after 9:30 on a Wednesday night and I'm still trying to put this article together- as you can see nothing has really changed for me over the years!). Along with hurrying to get the projects and other items ready for the fair, we would always have something that would fail at the last minute, but we would always take something to the fair. It may still have wet paint or something not quite totally finished. My parents would tell me "I hope you learned your lesson this year," but guess what- nothing really changed! As a kid, the leadership and guidance I received through this was a learning experience I still remember.

Grossenburg Implement would like to take this opportunity to "Thank" the people that have and are currently helping to shape our youth and keeping interest into those fine organizations. To all the leaders, parents, judges and everyone that helps in any way possible- THANKS!

In the calendar for this year Grossenburg Implement has put out all of the events going on in our towns, county regions and even states. Like the county fairs, local events, regional events and even state fairs. I know from my own past experiences and involvement in 4-H and FFA it takes a lot of time, reworking volunteers and other items to make this happen.

For the contestants of these events, this is just a reminder to not get overwhelmed. Slow down, enjoy what you are doing and have fun. Getting stressed out makes things worse- just stop, take a break, sit back and enjoy.

So to wrap this up, I would like to "Thank" the parents and leaders for taking the time to help our youth out!

JOHN DEERE

PREVENT ENGINE DOWNTIME

Ensure diesel fuel cleanliness
to reduce failures and repairs.

Three Parts to Clean Diesel

1

Use a pre-filter SWK-2000 Series in the engine fuel system. Heated filters are recommended for cold climates.

2

Filter the storage tank with a Reverso fuel polishing system, and move the failure point away from the engine fuel system.

3

Keep the fuel stable and separate more contamination with chemical additive.
