MAKE BIG MONEY

John Deere Field Connect Moisture Probe

With Harvest getting wrapped up for the 2016 growing season, it would be safe to say that the yields were outstanding, given the fact that we had a very wet spring and spotty rain during this summer. With commodity prices where they are and projected to go in 2017, it is more important now than ever to keep a close eye on your expenses. But that can be a double edge sword, take for instance the John Deere Field Connect moisture probe. Your first thought might be that it is an unnecessary expense in today's economy, but if you take another look at it, you might be surprised. For \$1,850 you can lease a John Deere Field Connect unit from Grossenburg Implement. The unit comes installed in your field and complete support from Grossenburg's and Complete Agronomy Solutions. So, for the initial investment of \$1,850 and knowing the exact time to water and how much to put on. This probe could save you (depending on the year) one, two or maybe even three rounds of the pivot running. The typical cost for an electric pivot is \$5.00 per acre per inch of water. That's \$800 per round on a quarter of land. If you can use the moisture probe to gauge other ground around you AND if you have three pivots not making that extra pass because you see your neighbors running- that's a savings of \$550! This does not count the wear and tear on pumps and motors. The same thing goes for your planter, tractor and combine. If the planter doesn't function properly, then you're not going to get even emergence that leads to yield loss, which affects your bottom dollar when it's all said and done. Being proactive in the winter and getting your KEY farming equipment in tip top working order could help you Make BIG MONEY vs. Costing YOU BIG MONEY. Let's face it, those key pieces of equipment are what gets our livelihoods started and finished in the right direction. It's an investment in your business and not an unnecessary expense for the up and coming season. So if we all step back and take a look at what needs to be done now for a profitable 2017 on your farm, you will have a good ROI for next year.

JOHN DEERE 4066R

Not Just for Agriculture or Around the Farm Anymore!

Winner Regional Airport has expanded its runway from 4,500 ft to 5,500 ft, which allows larger jets to land in Winner, SD. Dave & Tess Howard are the managers of Winner Regional Airport and recently purchased a John Deere 4066R tractor with e-Hydrostatic

Transmission. This tractor will be used for snow removal, mowing, but most importantly for pulling larger aircraft. Dave Howard was told by a pilot this year during Pheasant Hunting that their process of moving the large aircrafts is the smoothest that he has experienced. Dave has put a lot of credit to the John Deere 4066R and the easy to use e-Hydrostatic transmission. If anyone has not seen Winner's Airport in a while its worth driving to

see and also to come to Grossenburg Implement and test drive one of these compact utility tractors today!

Grossenburg

BLOOMFIELD STORE HIGHLIGHTS

- Radiator Shop
- Planter Test Stand Equipment
- DOT Inspections, Semi-Truck & Trailer Repairs
- Full Service Welding Shop Including:
 - Repair Stainless Steel & Aluminum
 - Repair Augers, Stock Trailers, Implements
 - Inventory of Steel on Hand
 - Offsale Steel Available
 - Custom Fabrications
- Full Service Radiator Shop:
 - Repair or Replacement
 - Aluminum or Brass Tanks, Cores, Necks
 - Oil Coolers & Aftercoolers

WINNER, SD

- Full Service Welding Shop
- Full Service Tire Shop Including-
Passenger Cars, Light Trucks, Semi-Truck & Trailer Tires, Complete Line of Agriculture Tires

NEW PRODUCTS

making farming more convenient

Most farmers are up at the crack of dawn and they don't quit till the sun goes down. A lot of that time is spent in the cab of a tractor. In the last few years John Deere has come out with a lot of new products to make it more comfortable and more convenient for you. Cell phones, tablets, GPS and other devices are key tools for today's farmers.

The monitor bracket (RE343680) has versatile mounting options on the front or rear cab post. It is easy to mount and has multiple displays and configurations for your monitors, accessories and anything else within the cab for maximum accessibility without compromising visibility. The cell phone bracket (BRE10015) holds most cell phones and iPods, even in the most rugged terrain. The four legged design holds your phone without hiding your phone behind foam pads or plastic. The tablet bracket (BRE10034 which subs to BRE10255) has a quick release cradle for large or medium-sized tablets. This bracket retails for \$85.80 and the monitor bracket (RE343680) is \$54.99 and the cell phone cradle (BRE10015) is \$61.60.

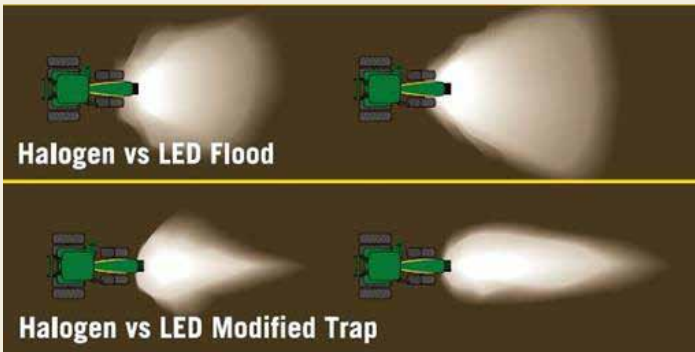

Ideal for long days in the field is the 12 volt Refrigerator/Warmer Mini Fridge. It can be used in any tractor or combine cab and can be used to keep cold beverages or snacks cold

or hot. The fridge takes only 60 minutes to cool down to 40 degrees or warm up to 140 degrees. The fridge can hold nine 12 oz cans and it only costs \$69.65!

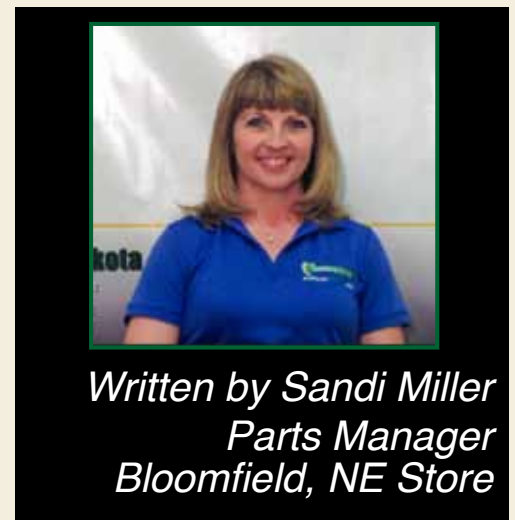

LED lights have also become very popular.

Farmers no longer have to mount extra work lights on the front or rear of their older John Deere equipment to get more light. All you need to do is replace your existing halogen bulbs with LED bulbs. These bulbs will increase your light pattern and eliminate reliability issues with the halogens. The cost is rather inexpensive- for example, the LED headlights for your 40 or 50 series tractors are only \$108/ea. Stop into any of our Grossenburg locations and ask about the proper LED lights for your specific applications.

John Deere also has a lot of new accessories for your Gator. Some of the most popular ones are OPS half poly windshield (BM25260) priced at \$347, the cargo box divider (BM22769) priced at \$205 or the WARN ProVantage 3500# 12 volt winch (BM24723) at \$603. This winch requires a mounting kit for installation and the price of that is \$268. There are numerous other options available for your Gator- too many to list here!

Don't forget to take advantage of the Spring Sale Catalog. A lot of these accessories will be featured in there to make the prices even cheaper. Also in February and March is our popular 16% off Filter Sale. Get your filter lists compiled and bring it in to any one of our locations so we may help you with all your filter needs.

IT'S THAT TIME AGAIN!

*Written by Ben Lauck
Service Manager
Bloomfield, NE Store*

First of all, I would like to congratulate everyone on a safe and successful 2016 harvest. It was a pleasure to assist you- the American Farmer in another great year. From all of us at Grossenburg Implement- THANK YOU! With another harvest in the books, it is time to begin looking forward to the next year. At Grossenburg Implement, you will still see many of the same inspection programs that you have come to know and trust. One addition to the program this year is the Year Round Multi-Unit Inspection Repair Program. This 3 tiered program allows you to have your first two machines inspected and repaired. These two machines qualify for 180 day No Payment/No Interest program (NP/NI). Your third and fourth inspections

also qualify for 180 day NP/NI program and you will also receive a 3% parts discount on parts installed by the dealership. Your fifth and above inspections will qualify for the 180 day NP/NI program and a 5% parts discount will be given on parts installed by the dealership. Please stop and talk to any of our professional staff to get full details and limitations on this new inspection program.

One last thing to think about when having your machines inspected is to have your High Pressure Common Rail machines flushed with injector cleaner. This is becoming more and more crucial to help keep your fuel systems clean and operating at peak performance. We are starting to see that if you wait to flush the fuel system after the machine starts sputtering and losing power, it is already too late and the chance for success with injector flushing is greatly diminished. An annual flush paired with your machine inspection will keep debris and deposits from building up in the fuel system and prematurely wearing out these expensive fuel system components.

Be sure to stop in and talk to our professional staff at any of our Grossenburg locations and get your equipment signed up for an inspection today to get your machine working well and looking good at the same time!
